AUTOMATIC FAVORITE POSITION FRONT SEAT
ASSEMBLY AND RELATED PARTS

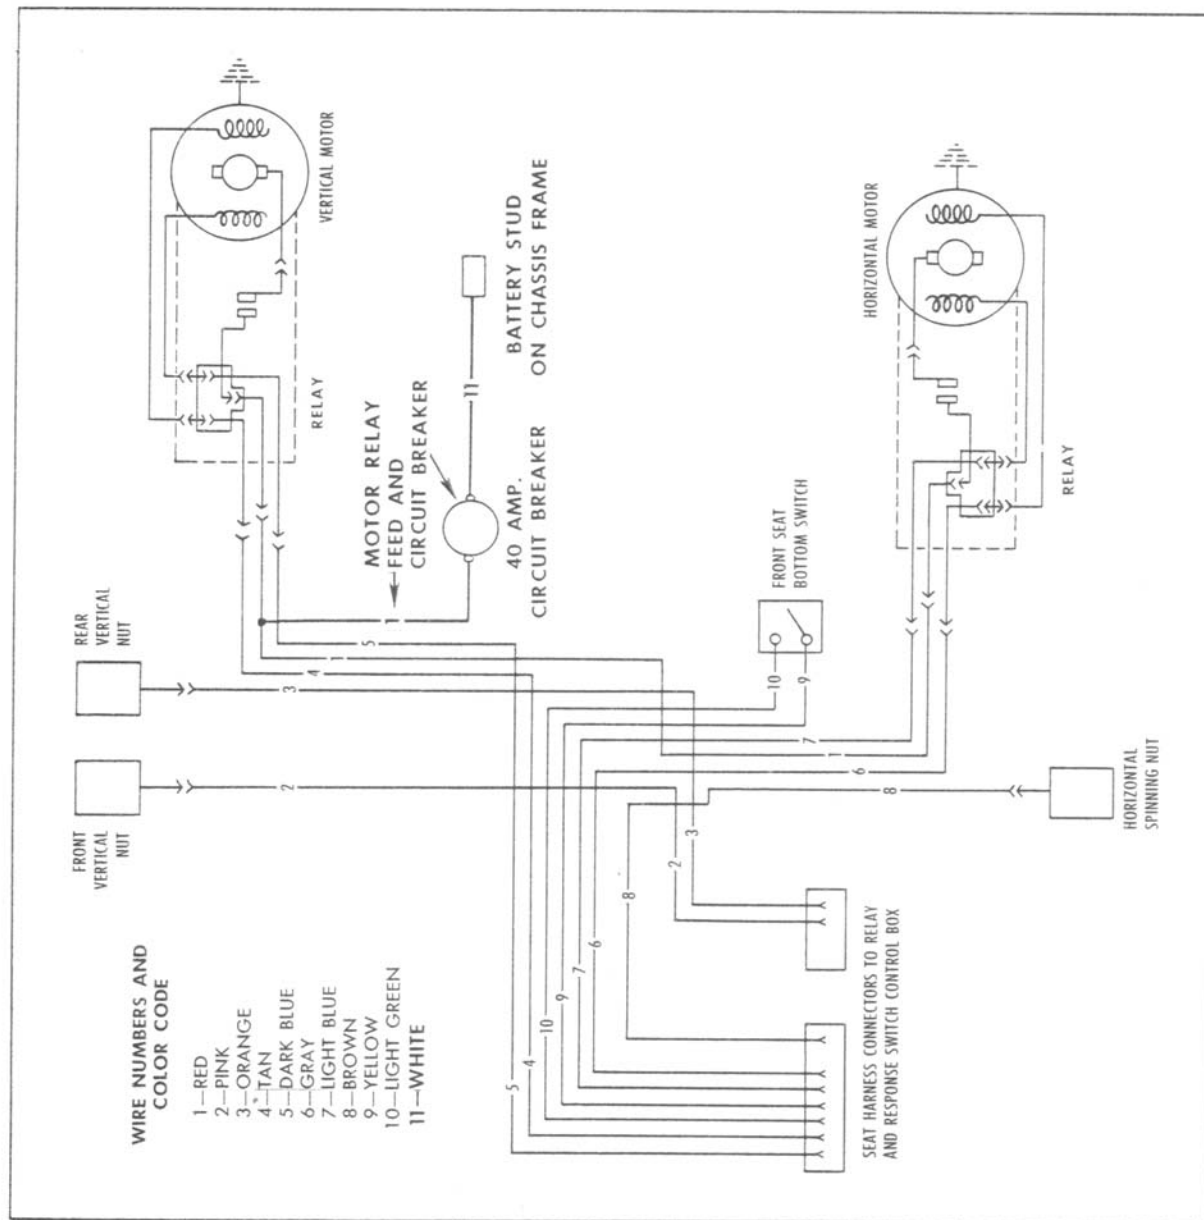

AUTOMATIC FAVORITE POSITION SEAT CIRCUIT DIAGRAM

Front seat checks.

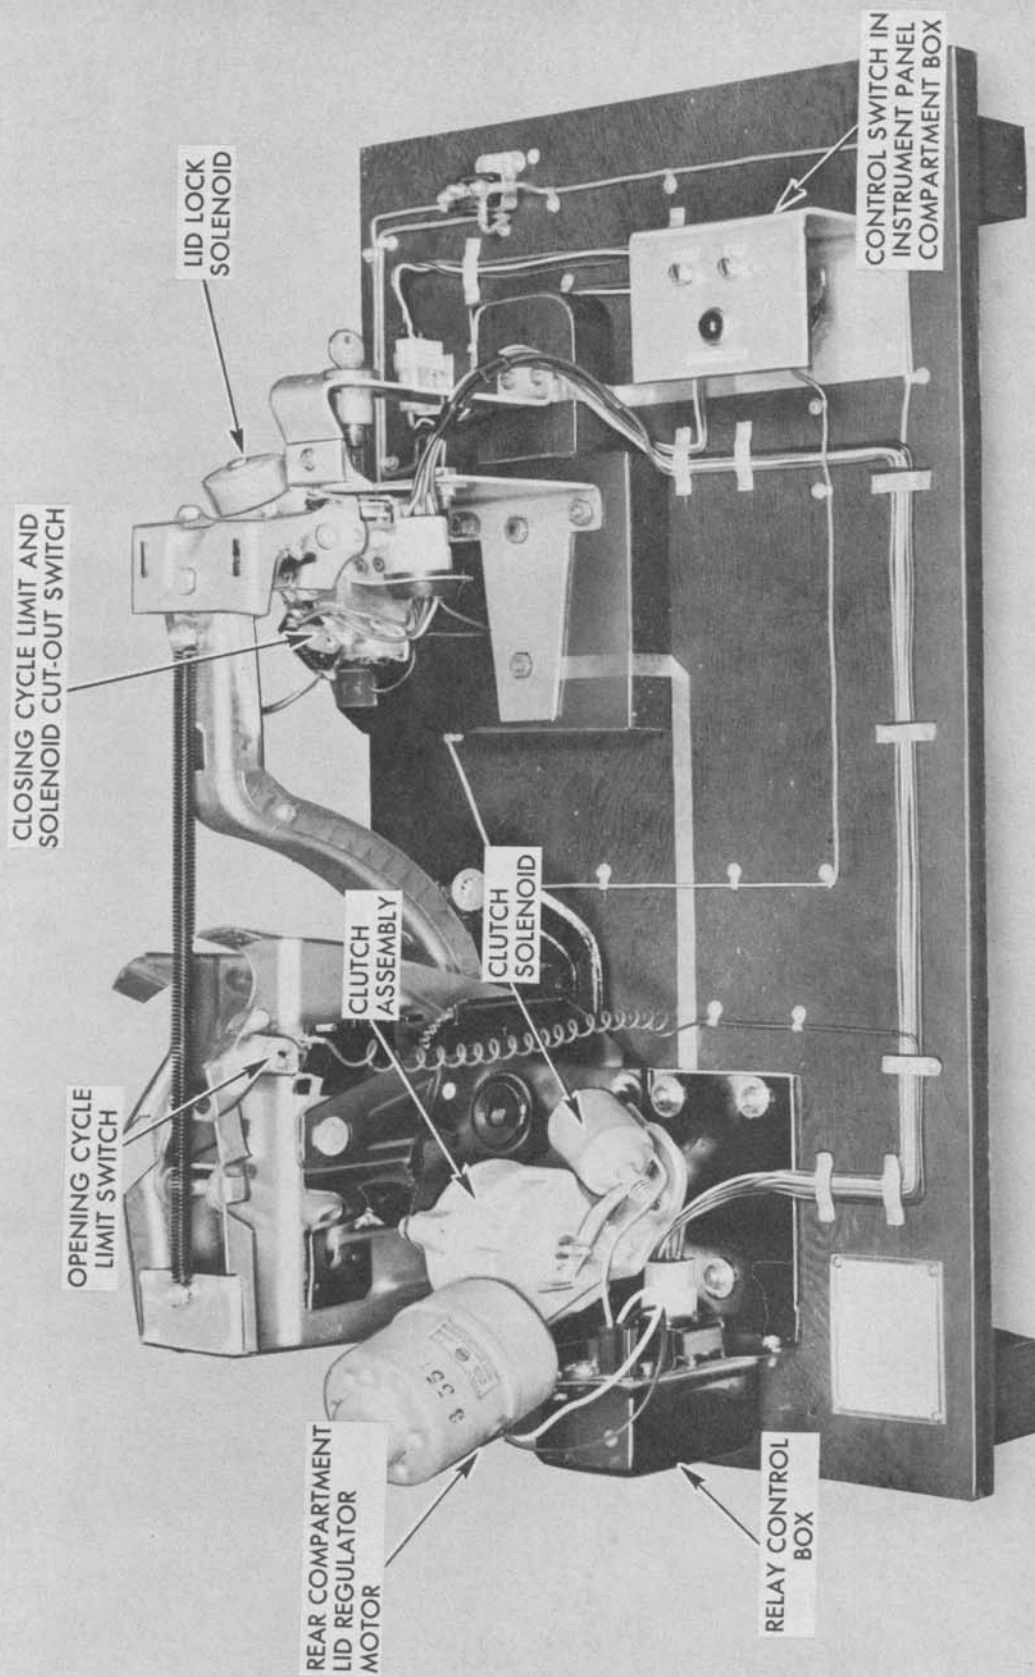

- 1 Check relay under either of cover plates
- 2 Feed to memory box front plug frame relay and both motor feed wires
- 3 Check door jam switches
Left door jam switch purple wire hot
Right door jam switch green wire hot
Left door must be closed to have right operate
- 4 Check switch on memory box first for being in off position
- 5 Check switch in cushion on driver side (seat bottom switch can be cut out by disconnecting and using jumper in feed wire socket)
- 6 Check seat dial selector switch
12 wires across top vertical controls (End wires feed wires)
9 " " " " bottom horizontal
1 light for switch wire on bottom
- 7 Check vertical motor relay.
To check remove one field wire from relay then connect jumper wire to terminal disconnected on relay.
Install light tester on armature wire & light should light dim.
Do same to other field lead.
- 8 Check seat actuator motor
1 wire connected to field lead and one to armature lead.
Check spinning nut
- 9 Horizontal motor, color cooler, spinning nut same as for vertical
